PLASTGUARD

## ROPE CHARACTERISTICS

#### Abstract

10-strand high performance wire rope for overhead cranes as well as some truckand container cranes. Special spin-resistant feature prevents much of the unwanted block twisting on overhead cranes. The PlastGuard core protection prevents metal to metal contact between inner- and outer strands and greatly reduces internal, undetectable, wear and abrasion. Also, the core is twisted in the opposite direction of the outer strands making this rope spin-resistant and therefore ideal for cranes where both rope ends are attached to the drum. Multi is a medium ForcePac'd rope to reduce initial rope stretch and to increase the outer strand contact area to sheaves and drum. 10 outer strands distribute the load pressures more equally thus reducing wear of the rope and your equipment.

| Nominal diameter [mm/inch] | Mass weight [kg/100m] | Minimum breaking load |  |
